

DISPENSING CABINETS

IPS Pumping Station — Large Walk-in Style

We build our dispensing units to suit your needs. The cabinet is a large 4' x 4' x 6' unit painted and decaled. Available in steel or aluminum. All equipment is heavy-duty and built to last.

To order, simply check the options listed below and call us for a complete price.

Designed for easy accessibility with side wall vents, fabricated hose hangers and various top quality components for your dispenser needs.

New cylinder purging system. Completely safe and less time consuming.

Three different styles of mounting skids to assemble tank and cabinet: full length, split, or I-beam. The skids are constructed with 4" I-beam and 3" channel leg supports. These also come primed and painted white.

Basic Unit Includes:

- 4' x 4' x 6' cabinet with LGF1D Blackmer pump with 1 H.P. exp. motor
- Unit is pre-wired, primed and painted
- 1/2" x 18' L.P. hose with Rego valve and filling adapter and assembled piping in cabinet

Choose From The Following Options:

- 3/4" Liqua-Tech meter, 1" L.C. meter or 1" Neptune meter
