

HOSE COUPLINGS

Extended Type Hose Couplings for Vapor and Liquid Service

Application

Designed especially for liquid filling and vapor equalization of LP-Gas and anhydrous ammonia. The limited travel of the handle on the tailpiece minimizes spin-off, encouraging cautious removal to properly bleed off trapped product to assure closure of the filler valve and hose end valve. The ACME threads are machined on a rugged steel insert which is permanently cast in the aluminum handle, providing for durability under repeated use.

Ordering Information

Item Number	Type of Service	Hose Connection (M. NPT)	Coupling Connection (F. ACME)
A7575L2*	Liquid	1/2"	1-3/4"
A7575L3	Liquid	3/4"	1-3/4"
A7575L4	Liquid	1"	1-3/4"
A7575L5**	Liquid	1-1/4"	1-3/4"
A7571LA	Vapor	1/2"	1-1/4"
A7571LB	Vapor	3/4"	1-1/4"

* Includes 7199-33 adapter, shipped loose.

** Includes A7575L5-1 adapter, shipped loose.

A7571 and A7575 Series

Short Type Hose Couplings for Vapor and Liquid Service
