

GAS BALL VALVES

Blue Top Gas Ball Valve

Application

Legend Blue Top Gas Ball Valves are AGA and CGA certified for use with natural, manufactured, mixed, liquified petroleum, and LP gas/air mixtures. The Blue Top features include:

- Patented one-piece design that eliminates the risk of leak between end adapter and body
- Soft rubber seats which respond and seal better than teflon on low pressure
- Forged construction eliminates the risk of leakage through sandholes
- **These special seats seal at low and up to 175 lbs. W.O.G., making it ideal for testing installations**
- Fast quarter-turn operation

GAS BALL VALVES/NEEDLE VALVES

Gas Ball Valve with Side Tap

Application

Legend Blue Top Gas Ball Valves with a 1/8" NPT side tap are of the same quality construction as ball valves. The side tap allows a manometer to be attached permitting the testing of line pressure at the valve and eliminating the need and cost for an auxiliary test tee.

- A brass plug is used rather than aluminum. This prevents the corrosive action caused by the connection of aluminum with brass
- Patented one-piece design
- Designed specifically for the gas industries, preventing confusion of alternate product use
- Heavy duty wrench flat on flare x flare valve for installation ease
