

HEATERS AND ACCESSORIES

Hot Box Construction Heater

Application

The Red Dragon CH220 "Hot Box" construction heater is one of the most efficient heaters available. It's built low to the ground for safety. Heat is deflected downward so more of the working area is warmed. In addition, its rectangular shape provides more radiating surface than cylindrical style heaters. The CH220 is rugged – when not in use they can be stacked to save valuable storage space.

The electronic ignitor and flame adjustment valve are easy to reach and a heat shield protects hands from high temperatures during operation. One bolt holds burner and controls in place so maintenance is easy. The CH220 is completely assembled when shipped.

Specifications:

- Heat Output: 200,000 BTU/hr. @ 20 psi
- 16 gauge metal frame
- High-pressure preset regulator, POL
- Thermoplastic safety control
- Piezo electronic ignitor
- 10 foot LPG hose
- Dimensions: 14H x 21-1/2W x 26"D
- Weight: 49.3 lbs.
