

Product Overview:

Propane Autogas Evacuation System

Remove autogas from your fleet vehicles simply and safely

Transferring autogas fuel made easy!

Stop venting your autogas into the atmosphere where fugitive emissions are released. Now you can reclaim and reuse your autogas in a safer and more efficient manner.

- Simple to use with both liquid and vapor vehicle systems
- Operates completely on air using a pneumatic pump with no engine, electricity, or switching of hoses
- Allows trained operators to flare the tank if needed. Rugged pneumatic wheels allow ease of movement over off-road rough surfaces.
- Includes a sight flow gauge that allows a visual of the transfer of propane during the operation
- Equipped with safety checks that only allow flow when hoses are connected

It transfers fuel from the vehicle fuel tank to:

- Another autogas vehicle
- A refueling station
- A separate LPG storage tank

Want to know more? Give us a call. Our propane autogas evacuation system is the easiest way to pump liquid out of fleet vehicles, saving you time and money!
